Lower Manhattan Cultural Council empowers artists by providing them with networks, resources, and support, to create vibrant, sustainable communities in Lower Manhattan and beyond. LMCC.net

4/28/18 PRESENTATION: NETWORK MUSIC – SPECTRUM, BROOKLYN NY

Presentation on "Network Music" by Sarah Weaver

IMPROVISATION IN THE AGE BEYOND MECHANICAL REPRODUCTION

a conference/festival curated by David Rothenberg and Nicola Hein

Improvisation, the spontaneous creation of music live, has paradoxically benefited tremendously from the value placed on recording performances, so past improvisations can be meticulously praised and studied. Now that recordings stream endlessly everywhere for free, and their value to some has plummeted to zero, how does this relationship proceed.

Spectrum NYC, 70 Flushing Avenue, Brooklyn, NY 11205

<http://www.spectrumnyc.com>

1:00 David Rothenberg, musician, philosopher, Professor of Philosophy and Music, NJIT

1:30 Nicola Hein, musician, philosopher

2:00 George Lewis, musician, philosopher, composer, Professor of Music, Columbia

2:30 Dafna Naphtali, composer, performer, lecturer, NYU

3pm BREAK

3:20 Andrew Drury, musician, director of Continuum Culture & Arts, Soup & Sound, Different Track Recordings

Narrative

Network Music utilizes the internet as a contemporary artistic medium for musicians on both localized networks and geographically spatialized networks. Network Music has proliferated in

recent decades in forms for live performance such as telematic ensembles, laptop ensembles, virtual world collaborations, and multidisciplinary work. Artists and technologists in this medium have utilized Internet2 and its international partner networks to achieve live concert-quality productions locally and globally, especially requiring the high-bandwidth and quality of service provided by these networks. Internet2 and its partners are largely available at large research universities so the medium has remained mostly in this research sphere. With the rise of availability of high-bandwidth public networks, Network Music is at a juncture where the medium can become more accessible to the public through a wider range of universities and contemporary arts venues, while the advancements of Internet2 and its partners continue to provide state-of-the-art opportunities to artists and technologists. "Network Music: Artistic and Technological Strategies for Public and Private Networks" aims to identify artistic and technological strategies for various degrees of these networks in order to determine tiers of Network Music capacities based on factors such as bandwidth, quality of service, system configuration, venue space, and location. The host site IACS provides an exceptional hub for this topic with a 100Gbps Internet2 network, while the event will connect with remote sites of wide-ranging networks. The conference will feature in-person and remote presenters for research papers, workshops, presentations, and concert demonstrations.

Conference Committee

Director: Sarah Weaver, Stony Brook University, NowNet Arts Inc.

Chris Chafe, Stanford University

Margaret Schedel, Stony Brook University

Min Xiao-Fen, Blue Pipa, Inc.

Keynote Speaker

Ann Doyle, Community Engagement Manager, Higher Education and Cultural Programs, Internet2

Keynote Biography

Ann Doyle founded and continues to lead Internet2's cultural initiatives working with U.S. and international partners utilizing advanced networks for collaborative live performances, master classes, and remote auditions in the performing arts. Her goal in joining the 2018 Network Music conference is to build bridges between this conference's innovative community and that of the Networked Performing Arts Production community <https://npapws.org> - highlighting opportunities for collaboration, and extending the reach of both the broadband and advanced networking communities across the globe. Ann is a recording artist herself and has a Master's degree in Higher Education Administration from the University of Michigan.
